INVITATION

COSPAR has initiated a new series of scientific meetings, the Symposia, aimed at promoting space research at a regional level and to be organized in countries with medium or small size space infrastructures. Each Symposium, highly interdisciplinary in nature, is intended to attract 500-1000 participants mainly, but not exclusively, from the region where the meeting takes place.

In South Korea, priority has in recent years been given to space research, and COSPAR will hold its third Symposium in Jeju, after a second successful event held in Foz do Iguaçu, Brazil in November 2015. The theme of the 3rd Symposium will be "Small Satellites for Space Research". Detailed information about this Symposium can be found from www.cospar2017.org.

It is my pleasure to provide you with the scientific program of this major scientific event and to invite your organization to become a sponsor.

Indeed, we will receive many requests for support from scientists hoping to participate in the Symposium, especially from young researchers and scientists coming from countries of the region with limited resources. We would be most grateful if you would consider making a contribution toward meeting these requests. I would like to stress that even a modest sum would be appreciated. In order to allocate funds as equitably and efficiently as possible, we prefer that financial support be without specific constraints. We plan to allocate funds primarily to young scientists but will, of course, respect wishes of sponsors providing support. Please do make clear in your response any restrictions which may apply to the allocation of funds offered.

All sponsors will be listed in the Symposium documentation and reports. Sponsoring organizations which provide financial support will be specially acknowledged, and will be offered privileged conditions for access to the Symposium.

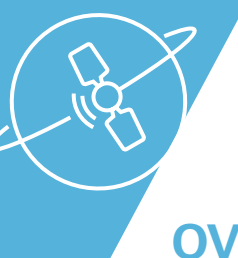

To assist the greatest number of scientists possible, I request that you please send your responses, positive or negative, concerning sponsorship.

Yours sincerely,

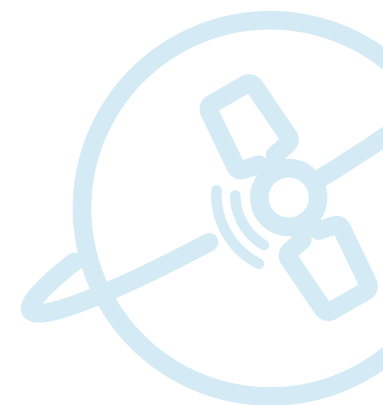

Dr. Young-deuk Park

Chair
The Korean COSPAR Committee

OVERVIEW

| ABOUT COSPAR Symposium

The Committee on Space Research (COSPAR) was established by the International Council for Science in 1958. Among COSPAR's objectives are the promotion of scientific research in space on an international level, with emphasis on the free exchange of results, information, and opinions, and providing a forum, open to all scientists, for the discussion of problems that may affect space research. These objectives are achieved through the organization of symposia, publication, and other means.

The COSPAR symposium has been initiated by COSPAR which aims to promote space research at a regional level in emerging countries and will be held every two years in a different area of the world. The Symposium will include multidisciplinary and training sessions. The first COSPAR symposium was held in Bangkok, Thailand in 2013 with the theme of "Planetary Systems of our Sun and other Stars, and the Future of Space Astronomy", and the second symposium in Foz do Iguacu, Brazil in 2015 with the theme of "Water and Life in Universe". The third symposium will be held in Jeju, South Korea in 2017 with the topic of "Small Satellites for Space Research". Worldwide scientists and professionals will get together to discuss of new opportunities of space research with small satellites.

SYMPOSIUM THEME AND TOPICS

| Small Satellites for Space Research

The program for the 3rd COSPAR Symposium is designated to cover a wide scope of space research under the theme “**Small Satellites for Space Research**”. The Keynote, Plenary, and Interdisciplinary talks will give the insight of space research with small satellite platform and the three parallel sessions are designed for the several scientific and technical sessions.

- Atmosphere & Climate Change
- Satellite Dynamics
- Earth-Moon System
- Sub-satellite Orbit (Ballooning)
- Planets and Small Bodies
- Radiation Belt Environment
- Upper Atmospheres and Ionosphere
- Space Weather
- Heliosphere and Magnetosphere
- Planetary Protection
- Astrophysical from Space
- Space Exploration
- Life Science in Space
- Enabling Technologies
- Fundamental Physics in Space
- Others

WHY 3rd COSPAR SYMPOSIUM

COSPAR Symposium is the premier international event in space research fields, and in 2017 it will be hosted in Jeju, Korea. The COSPAR Symposium 2017 is expected to bring together around 500 scientists and professionals from around the world to exchange ideas and share experience on a global level.

Sponsorship of COSPAR Symposium provides a unique chance to raise the international profile and position for your organization to be at the forefront of the space challenges. Sponsorship of this event also helps move the internal industry arena forward by supporting the participation of many talented researchers; therefore, it helps uplift the image of your organization. Do not miss out on these various sponsorship opportunities that we have to offer. All sponsorship categories are filled on first-come, first-serve basis.
